

CHIN HIN AI PRICING STRATEGIST USER GUIDE

PURPOSE

Chin Hin AI Pricing Strategist helps business users make faster, safer, and more explainable pricing decisions. It combines uploaded business documents, AI recommendations, finance logic, approval governance, and decision traceability in one platform.

WHO USES THE SYSTEM

SALES MANAGER

- ? builds quotes
- ? reviews AI recommendations
- ? checks true margin and leakage control
- ? reviews campaign, contract, and competitor context
- ? requests approval if required

SALES DIRECTOR APPROVER

- ? reviews pending approvals
- ? compares requested price vs AI recommendation
- ? checks policy source references
- ? checks business impact before approving or rejecting

EXECUTIVE VIEWER

- ? tracks pricing health
- ? monitors leakage and margin trends
- ? reviews approval speed and pricing compliance

ADMIN GOVERNANCE

- ? uploads and governs business files
- ? manages users and roles
- ? reviews extracted rules
- ? manages policy, campaign, contract, and rebate controls
- ? reviews AI traceability and model activity

LOGIN DETAILS

All demo users use password 123456.

- ? Admin: admin@gmail.com
- ? Sales Manager: salesmanager@gmail.com
- ? Sales Director Approver: salesdirector@gmail.com
- ? Executive Viewer: executiveviewer@gmail.com

Important:

- ? only the admin account can create new users

MAIN AREAS

- ? Login: /login
- ? Sales: /sales
- ? Approvals: /approvals
- ? Analytics: /analytics
- ? Admin: /admin
- ? Upload Center: /upload-center

HOW THE PLATFORM WORKS

1. UPLOAD BUSINESS FILES

Business files are uploaded through the Upload Center.

Examples:

- ? price lists
- ? policy PDFs
- ? campaign memos
- ? trading terms
- ? rebate agreements
- ? contract pricing sheets
- ? competitor pricing files
- ? strategic target sheets

2. EXTRACT AND STRUCTURE INFORMATION

The system:

- ? detects the document category
- ? validates whether the role can upload it
- ? extracts useful business data
- ? creates a summary
- ? stores confidence and review status

3. ACTIVATE BUSINESS RULES

Once reviewed, uploaded data becomes usable pricing logic such as:

- ? policy clauses
- ? active pricebooks
- ? campaign rules
- ? rebate programs
- ? contract pricing controls

4. GENERATE RECOMMENDATIONS

When a quote is evaluated, the system combines:

- ? quote details
- ? finance logic
- ? policy rules

- ? pricebooks
- ? campaigns
- ? rebates
- ? contracts
- ? competitor data

The output includes:

- ? recommended price
- ? confidence
- ? true margin
- ? leakage amount and reasons
- ? market comparison
- ? next best action

5. ROUTE FOR APPROVAL IF NEEDED

If a quote is risky or out of policy, it is routed to the approver with:

- ? requested price
- ? AI recommendation
- ? policy source reference
- ? business impact
- ? approval trail

FIRST-TIME SETUP

START THE BACKEND

```
cd "backend"
& ".\venv\Scripts\Activate.ps1"
python -m uvicorn app.main:app --reload --host 0.0.0.0 --port 8000
```

START THE FRONTEND

```
cd "frontend"
npm run dev
```

OPEN THE APP

- ? Frontend: <http://localhost:5173>
- ? API docs: <http://localhost:8000/docs>

DEMO UPLOAD PACK

Use the ready-made upload pack here:

- ? [docs/demo-upload-pack](c:/Users/rafiu/OneDrive/Desktop/github%20upload/Chin%20hin/ai%20pricing/docs/demo-

upload-pack)

? [docs/demo-upload-pack/README.md](c:/Users/rafiu/OneDrive/Desktop/github%20upload/Chin%20hin/ai%20pricing/docs/demo-upload-pack/README.md)

? [docs/demo-upload-pack/upload-checklist.csv](c:/Users/rafiu/OneDrive/Desktop/github%20upload/Chin%20hin/ai%20pricing/docs/demo-upload-pack/upload-checklist.csv)

RECOMMENDED UPLOAD ORDER

1. Product Catalog
2. Current Price List
3. Competitor Pricing
4. Promotion Calendar
5. Pricing Policy
6. Campaign Memo
7. Trading Terms
8. Rebate Agreement
9. Contract Pricing Document
10. Strategic Targets

WHAT TO SHOW IN A DEMO

SALES MANAGER
